Title: MMT Field Technician

Purpose: Perform Field Testing Services for Innovative Instrument Company

Company Introduction:

Massachusetts Materials Technologies (MMT) <http://www.bymmt.com/> is an emerging company that develops innovative nondestructive testing (NDT) equipment and support services for field inspection of critical energy infrastructure. Our technology reduces asset integrity risk as well as improves safety and environmental sustainability through innovation. We provide customers with accurate and reliable information about the structural integrity, material strength, and toughness of valuable assets. Applicable industries include energy, transportation, nuclear, and defense. Current growth requires a dedicated team to provide field testing services using the Hardness, Strength, and Ductility (HSD) Tester for evaluating oil and gas pipelines.

Position Description:

MMT is seeking a field technician with a mechanical background and extensive hands-on experience with various tools and equipment to join our talented team. The field technician will be responsible for utilizing MMT's testing instruments to complete field services. New hires will be put through a training program to become comfortable with the testing instruments and familiar with the data, and quality standards for that data, that they will be collecting in the field. The position requires a commitment to travel to test sites to support the deployment of the testing services.

Field technicians will be working in indoor and outdoor environments year-round exposed to all seasonal elements. The work involves carrying, lifting, and/or moving objects in excess of 50 pounds, and working in a variety of test sites that require the efficient use of ladders, stairs, or scaffolding in excess of 100 feet. Few of these sites will be near industrial hazards however all will require proper OSHA training and personal protective equipment and safety measures to be taken; all of which will be provided by MMT. Field technicians will spend a large portion of the day on their feet, and extended hours are highly anticipated. Monthly drug testing will be required.

Responsibilities Include:

- Field testing
 - Travelling to sites
 - Setting up NDT equipment and performing calibrations
 - Collecting data through testing and documentation as outlined in MMT procedures
- Supporting existing product and troubleshooting
- Completing MMT's field technician training

Skills Required:

- Technical skills and knowledge of mechanics and machinery
- Proficient with various power tools and familiar with hand tools
- Strong problem-solving skills and attention to detail
- Ability to implement critical thinking for troubleshooting
- Comfortable working in a fast-paced environment
- Must have reliable mode of transportation
- Ability to take direction

Benefits of working within our group include:

MMT offers a competitive compensation package including 401k, health insurance, paid vacations, travel per diem, and the opportunity to work with cutting edge technology in a collaborative work environment
